Your Safe Access to a Secure World

NEW!

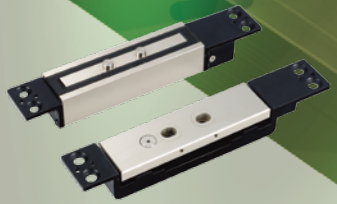
All In One Mini proximity Card Reader

- 43mm wide compact size.
- Waterproof design.
- ST-910/920 ER Series standard Wiegand output.
- ST-920EA Series All In One Stand-alone Access Control System.
- ST-980EA Series All In One Network Access Control System.

All Stainless Steel Proximity Access Control

NEW!

- Mortise and Water-proof designed.
- 8 sets of door opening passwords which can be set by users.
- Durable stainless steel panel and buttons with indicator lights.
- Capacity for valid cards is 1,000 cards.
- Five door opening methods.
- ST-226:ANSI Style,ST-228:British Style.



NEW!

Shear Lock

- Compact and easy to install.
- Built-in control panel which has shunt time function,and monitor output.
- Hold Force(shear):1200Kg.(2600 lbs).
- Suitable for all types of 180 ° door.
- Power input: DC12~24V automatic adjustable.
- It will automatically relock again when locking action is not completely done.

Dead Bolt Lock Series

- There are Fail-safe type and Fail-secure type to be selected.
- Build-in door sensor and lock position.
- Built-in delayed egress control point.
- Power supply DC12V, with MOV surge protection.

Electromagnetic Lock Series

- Power supply: DC 12V or DC24V.
- Fail-safe type,suitable for use at public places.
- Built-in lock status sensor, timer and door status sensor(Optional).

SI-15 Infrared Touchless Sensor

- Made of stainless steel & Polycarboate fire-proof material.Suitable for access controll system.
- Built-in microcontroller.Use of special infrared encoder design in order to avoid distraction of other infrared.
- Double color status light (Standby: Red; Proximity: Blue)
- Adjustable proximity range (3~15cm).
- Door opening time is able to set trigger state (0.5~20sec) or toggle mode.
