

**DEEP
GUARD**

**SECURING TOMORROW WITH
AI-POWERED INNOVATION**

Welcome to DEEPGUARD .AI Inc., a distinguished US-based company headquartered in the vibrant state of California. Our journey began in 2018 with a clear vision – to provide impeccable, state-of-the-art AI- driven perimeter security solutions. These solutions are meticulously crafted to fortify and elevate the safety of not only homes but also commercial establishments.

Rooted in our founding members' profound expertise within the technology sector, we embarked on this venture with resolute determination.

The goal ? To harness our collective knowledge and experience to give rise to an unparalleled add-on device. This device stands as a testament to innovation, as it possesses the capability to seamlessly transform conventional security systems into proactive shields against intrusion, veering away from the limitations of reactive frameworks.

At DEEPGUARD .AI Inc.,we are committed to safeguarding your spaces with the utmost integrity and ingenuity.

Join us in revolutionizing security – one intelligent solution at a time.

The exceptional values powered by AI

- **Human/vehicle detection**
- **Smoke/fire detection**
- **License plate recognition(LPR) and detection on pre-defined black list/VIP vehicles**
- **Advanced AI analytics**
- **Advanced AI human SLIP / TRIP / FALL detection**
- **Surveillance –GPT**

INSTANT REMOTE ACCESS See every camera and location from any computer, mobile phone, or tablet. No matter where you are or what time of day it is, you can view live video, search all video, adjust camera settings, email videos, and more.

CUSTOMERS AROUND THE GLOBE IN VIRTUALLY EVERY INDUSTRY TRUST DEEPGUARD Networks for actionable business intelligence and security.

- Multi-Family
- Smart Cities
- Education
- Healthcare
- Logistics and Warehousing
- Government
- Agriculture
- Restaurants
- Retail
- Convenience Stores
- Banking
- Hotels
- Parking
- Airports
- Religious Institutions

“ DEEPCUARD AI has proven itself by producing the most accurate detections and false alarm rejection we have ever seen. ”

STOP FALSE ALARMS

DEEPCUARD's AI has been trained to ignore common causes of false alarms, such as bugs, cobwebs, rain and snow, without reducing AI sensitivity.

ADD INTELLIGENCE TO ANY SECURITY CAMERA

Connect DeepGuard AI to any IP cameras to instantly upgrade any system, from residential properties to warehouses, and bring cameras from multiple brands under one, easy-to-use app

MAXIMIZE PRIVACY & BOOST RELIABILITY

DEEP GUARD .AI stores and analyzes your video locally - not in the cloud. Build a system with faster video processing, instant alerting, reduced bandwidth consumption, complete data privacy, and AI that still works when the internet is down.

TAKE CONTROL OF SECURITY ALERTS

Focus your attention on the information you and your users need. Avoid alert fatigue and lost time with analytics that work the way you want them to.

30+ Classifications

Choose alerts for people, animals, vehicles or deliveries.

Alert Areas

Draw areas on camera feeds for DEEPGUARD AI to focus on or ignore.

Enhanced AI Modes

Boost AI performance with Long Distance mode and Sensitive Mode.

Multi-AI Architecture

Get 4x more analysis of video than with conventional AI systems.

EDGE COMPUTING DELIVERS AI WITHOUT THE DRAWBACKS

Power of the edge

Plug and play: auto-connect to any IP camera

24/7 continuous, local recording

Powerful AI on high-resolution video

Convenience of the cloud

Scale to infinite location, users, cameras

Infinite cloudbackup for saved clips

Automatic software updates

On one dashboard, from anywhere

Built-in Zero Trust security for secure access and use

Robust Role Based Access Control with AD + SAML tie-ins

Full video delivery and network observability

Backup alerts with USB,
network and cloud storage

Get access and
alerts on all
devices

Connect to any IP
security cameras

Connect to monitoring stations,
PSIMs and leading VMS

Trigger lights and audio
warnings automatically

CALM. COOL. COMMUNICATED.

Here's why organizations depend on DEEPGUARD everyday.

Easy

Intuitive User Interface

Designed for use under duress, you can get up-to-speed quickly and take action when needed. Powerful and feature-rich, yet easy to use.

Cloud-based Access

Log in to failure-resistant infrastructure available from any desktop or mobile device.

24

Success Program

A dedicated team to help you set-up, customize, deploy, train, test, and improve. accessible 24/7. Constantly

Flexible User Management

Optimize your user management options-including opt-in, opt-out, and self-service subscriptions. Connect your systems directly with the DEEPGUARD API.

Grouping & Multi-level Administration

Organize recipients into public or private groups and by department, geography, or role. Enforce access and policy compliance with custom admin role permissions.

ADVANCED AI ANALYTICS

The Advanced AI Analytics Service offers the flexibility to pay for specific features required, allowing clients to tailor their analytics package according to their needs. Customizable AI solutions are also available for unique use cases, ensuring a comprehensive and tailored approach to data analysis

SPILL DETECTION

- DeepGuard AI detects liquid spills and provides real-time alerts to responsible personnel
- AI models detect most spills – including clear and colored liquids such as water, orange juice, milk, and soda
- Optimized for tough backgrounds such as linoleum floors and speckled concrete

SLIP / TRIP / FALL

- Advanced AI capabilities for accurate slip/trip/fall detection utilizing computer vision technology to detect events in real-time
- Multi-tiered alerts via email, text, audio, or API integrations into existing systems
- Respond quickly and prevent accidents before they occur, ensuring a safer work environment and reducing insurance risk

SMOKE & FIRE

- Ensure human safety and protect valuable inventory with efficient smoke and fire detection, even in traditionally challenging environments like outdoor spaces and large indoor areas
- Use existing cameras to detect smoke and fire, both indoors and outdoors
- Integrates with other platform features to provide real-time alerts and longitudinal metrics

SURVEILLANCE- GPT

CLOUD VIDEO SURVEILLANCE

Efficiently Search All Surveillance Video

same way you search the Save time and money with the ability to search across multiple cameras and locations, returning accurate results. Stop wasting time scrubbing through video and immediately find the exact people, vehicles, or objects you're looking for—even search live video during critical incidents

- **Search by description**

Search surveillance video the same way you search the web (Examples: Blue shirt with backpack; Red Toyota truck Person on bike)

- **Narrow results by date/time**

Pinpoint specific video or incidents from any location or camera by choosing to view a specific date and time

- **See exact video results**

Powerful AI delivers fast and accurate search results from any cloud-connected camera

- **Easily download and share video**

Set alerts and make informed decisions during critical incidents with accessible and shareable video clips.

SURVEILLANCE- GPT

CLOUD VIDEO SURVEILLANCE

S-GPT Smart Video Search is an added feature in the DEEPGUARD PRO, there are no installations required.

S-GPT works with your current cameras and all DEEPGUARD SVR- no upgrades or specialized cameras needed.
